***Response to Amendment***

This is in response to an amendment file on November 21<sup>st</sup>, for letter for patent filed on November 12<sup>th</sup>, 1999 in which claims 1-20 were presented for examination. Claims 1-20 have been canceled, and claims 21-34 have been added. Claims 21-34 pending in the letter.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 21-24, 32-34 27-29 drawn to method for recording digital data and performing playback control, classified in class 713, subclass 153.
  - II. Claims 25-26, 30-31 drawn to method for creating digital data, classified in class 705, subclass 51.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because they suggest distinct inventive concept. The subcombination has separate utility such as creating digital data by encoding watermark in the digital data.

Art Unit: 3621

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
